PROFESSIONAL SUMMARY

Third-year B.Tech student specialising in Artificial Intelligence & Data Science at IIIT Sri City. Hands-on experience in end-to-end data pipelines, predictive modelling, and interactive dashboards. Proficient in Python, SQL, Power BI, and core ML frameworks. Seeking Data Analyst / Data Scientist roles where analytical rigour and data-driven storytelling create measurable impact.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

Aug 2024 – Present

Indian Institute of Information Technology (IIIT), Sri City, Andhra Pradesh

Higher Secondary Certificate (HSC) – Science (PCM + CS) | 92.33%

2022 – 2024

JJ High School, Buldhana, Maharashtra

Secondary School Certificate (SSC) | 95%

2021 – 2022

Sahakar Vidya Mandir, Buldhana, Maharashtra

WORK EXPERIENCE

Market Analyst Intern – Finlatics

May 2025 – Jul 2025

- Conducted in-depth analysis of IT sector companies, with focus on Persistent Systems and L&T Technology Services (LTTs).
- Prepared comprehensive financial and strategic reports identifying growth potential and market opportunities.
- Delivered actionable insights on competitive positioning and investment signals within the technology sector.
- Awarded a Letter of Recommendation for strong analytical and research contributions.

PROJECTS

Bachelor's Thesis – Implementation of AI/ML in Industrial Maintenance

IIIT Sri City | Ongoing

- Researching AI/ML applications for predictive maintenance in industrial systems.
- Exploring anomaly detection and failure prediction models to minimise downtime and optimise operations.

Bank Customer Retention Agent – ML & Adaptive Decision-Making (AIKR Course Project)

Python, Scikit-learn, RL | 2025

- Built a learning-based agent combining supervised ML models with adaptive decision-making to predict and prevent customer churn.
- Integrated feature engineering and model interpretability techniques (SHAP) for actionable retention strategies.

End-to-End Customer Churn Prediction (ANN + Streamlit)

Python, TensorFlow/Keras, Streamlit | 2025

- Designed and deployed an Artificial Neural Network pipeline for churn prediction with an interactive Streamlit web app.
- Achieved competitive accuracy through hyperparameter tuning and class-imbalance handling (SMOTE).

Credit Card Fraud Detection Model

Python, Scikit-learn, XGBoost | 2025

- Built and optimised an ML model for real-time fraud detection, handling severe class imbalance via SMOTE and ensemble methods.
- Delivered strong precision-recall trade-off suitable for production-grade fraud pipelines.

Stock Price Trend Prediction Dashboard

Python, Prophet, Streamlit, Plotly | 2025

- Developed a fully interactive dashboard for stock trend forecasting using Facebook Prophet time-series models.
- Visualised confidence intervals and historical trends with Plotly for intuitive data exploration.

Power BI Dashboards – Blinkit Grocery Sales & Real-Time Weather

*Power BI, Weather API, Figma,
DAX | 2025*

- Built a Blinkit Grocery Sales Dashboard with KPI cards, drill-through filters, and revenue trend analysis.
- Designed a real-time Weather Dashboard integrating live API data with dynamic slicers and Figma-inspired UI.

TECHNICAL SKILLS

Languages & Querying	Python, C, SQL
ML / AI	Scikit-learn, TensorFlow/Keras, XGBoost, Prophet, SHAP, SMOTE
Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, Plotly
Visualisation & BI	Power BI, Streamlit, Figma, DAX
Databases	MySQL, SQLite
Tools & Platforms	Git, GitHub, Jupyter Notebook, VS Code, Google Colab
Core Concepts	DSA, Statistics, Machine Learning, EDA, Feature Engineering, Predictive Modelling
Soft Skills	Analytical Thinking, Team Collaboration, Problem Solving, Research

CERTIFICATIONS

- Career Essentials in Data Analysis – Microsoft & LinkedIn Learning (2025)
- McKinsey.org Forward Program (2025)
- Tata Data Visualisation: Empowering Business with Effective Insights (Job Simulation) – Forage (2025)
- Effective Leadership – HP LIFE (2025)
